

Overture

Checked before the trade. Not audited after it.

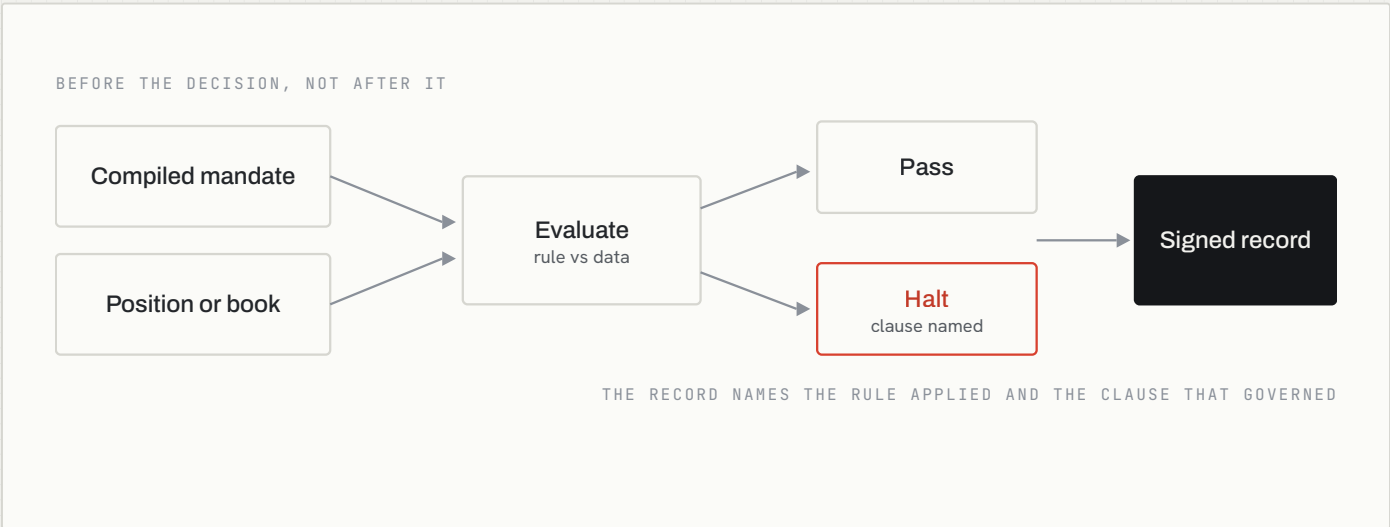

THE PROBLEM

Compliance finds the breach after the fact, from records the firm authored itself. By then the position is on the book.

The explanation is a reconstruction, produced on the firm's own hardware, which is exactly the evidence that does not survive a challenge.

HOW IT WORKS

- 01 The compiled mandate loads as executable rules, each carrying the clause it came from.
- 02 A position, a trade or a whole book is tested before the decision is taken.
- 03 The result records the rule applied, the data weighed and the confidence held.
- 04 An independent signer seals it, and the record verifies offline without our systems running.

DECISION	EVIDENCE	DEFENCE
A pass or a halt, with the governing clause named	A signed decision record, replayable	An examiner pack a third party verifies alone
