TECHNICAL SHEET / PRIVATE AI

Antechamber

Test the authority before granting it.

TYPE	IN THE MACHINE	PUBLISHED
Qualification architecture	Sign-off	October 2026

01 / WHAT IT IS

What it is

Antechamber is a pre-production qualification approach for evaluating an agent against its intended policy boundaries and operating task.

TYPE	Qualification architecture
GROUP	Private AI
IN THE MACHINE	Sign-off
SOLVES	Private AI and model evaluation, Governed workflows
BROUGHT BY	Advisory

02 / HOW IT WORKS

How it works

In order. Each step is checked before the next begins.

01	**Candidate capability**
02	**Policy-bound tests**
03	**Inspected results**
04	**Defined authority**

> IN PRACTICE
>
> An agent starts without execution authority. Evaluation determines whether a specific scope can be granted, narrowed or refused.

03 / WHO IT IS FOR, AND HOW IT IS APPLIED

Who it is for, and how it is applied

Who it is for

Institutions assessing an agent before granting access or execution authority.

How it is applied

The architecture extends shadow evaluation into a defined qualification path. A test result supports a bounded decision about use; it is not blanket approval or third-party certification.

04 / CONNECTED WORK

Connected work

Antechamber works alongside these systems.

SYSTEM	WHAT IT DOES
sh4pe	Keep the model close to the work.
Overture	Authority before action.

05 / READ ON
