TECHNICAL SHEET / GOVERNANCE

Overture

Authority before action.

TYPE	IN THE MACHINE	PUBLISHED
Governed runtime	Checks	October 2026

01 / WHAT IT IS

What it is

Overture is a governed platform for institutional data analytics and investment decision support.

TYPE	Governed runtime
GROUP	Governance
IN THE MACHINE	Checks
SOLVES	Executable governance, Governed workflows
BROUGHT BY	Embedded engineering, Policy compilation, Compliance review

02 / HOW IT WORKS

How it works

In order. Each step is checked before the next begins.

01	**Proposed action**
02	**Approved rule**
03	**Permission or review**
04	**Decision record**

> IN PRACTICE
>
> A proposed investment action meets its mandate before it reaches execution. An incomplete assessment pauses; a hard limit refuses the action.

03 / WHO IT IS FOR, AND HOW IT IS APPLIED

Who it is for, and how it is applied

Who it is for

Investment, operations and governance teams coordinating AI-assisted decisions.

How it is applied

The conductor in the architecture: it connects approved rules, bounded execution and the resulting decision record. Authority is defined for the workflow and institution.

The platform

Pre-built on our methodology. The client calibrates it, and it shapes itself around the firm. Built on the DAP Standard taxonomy, with Living Policy Architecture at its core.

How it fits

An orchestration layer that puts policy checks, permissions and accountable review in the path of institutional work.

04 / CONNECTED WORK

Connected work

Overture works alongside these systems.

SYSTEM	WHAT IT DOES
Living Policy Architecture	Policy becomes working infrastructure.
Decision Provenance	Keep the decision with its basis.
Antechamber	Test the authority before granting it.
Overture PI	Living Policy Architecture for personal injury law.

05 / READ ON

Read on

1. Living Policy Architecture, on SSRN
